

# Inventory of leaf miners and midge galls of Mary Mix McDonald Woods and other sites in Northeastern Illinois,

**Principle Investigator:** James Steffen

This inventory compiles 214 records of leaf miners and midge galls observed by James Steffen (Woodland Ecologist, emeritus, Chicago Botanic Garden) in Mary Mix McDonald Woods (Glencoe, IL, USA) and other plant communities in Northeastern Illinois from 2020 to 2022. Observations have been identified to genus (and species, when possible) and are provided along with the species of plant host, plant host family, location, and type (leaf miner or midge gall). Hyperlinks to observations on iNaturalist are also provided for > 200 observations.
